

# Music throughout your home.

Simple Sonos control combined with discreet Sonance architectural speakers, designed around the way you use each room.

# Explore Room by Room

Discreet architectural speakers bring music into kitchens, living rooms, bedrooms and bathrooms. Garden speakers extend your system outdoors. Explore room options in our interactive online book.

Speaker positioning, amplification and control are designed around the layout of your home.

# Beautiful sound. Discreetly installed.

Whole-home audio lets different rooms enjoy the same music or independent listening, while keeping technology visually unobtrusive.

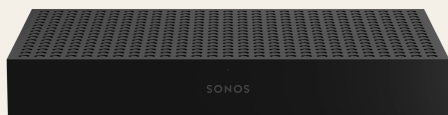

Kitchen Everyday music integrated into the heart of the home.

Lounge High-quality listening without filling the room with equipment.

Bedroom Independent music with simple app control.

Garden Extend entertainment naturally outdoors.

# 4 Room System

A focused introduction to whole-home audio for the principal living and entertaining spaces.

Additional Zones

# Take the music outside.

Outdoor loudspeakers and weather-appropriate entertainment solutions can extend the same experience to gardens, terraces and entertaining spaces.

Designed as part of the home rather than added afterwards.

# Designed around your home.

Riverside HiFi can design the room layout, speaker positioning, amplification, network requirements and control experience as one complete system.
